Caste Isabel Wilkerson 2020-08-04 #1 NEW YORK TIMES BESTSELLER • OPRAH'S BOOK CLUB PICK •

“An instant American classic and almost certainly the keynote nonfiction book of the American century thus

far.”—Dwight Garner, The New York Times The Pulitzer Prize-winning, bestselling author of The Warmth of

Other Suns examines the unspoken caste system that has shaped America and shows how our lives today

are still defined by a hierarchy of human divisions. #1 NONFICTION BOOK OF THE YEAR: Time ONE OF

Kirkus Prize Finalist “As we go about our daily lives, caste is the wordless usher in a darkened theater,

flashlight cast down in the aisles, guiding us to our assigned seats for a performance. The hierarchy of caste

is not about feelings or morality. It is about power—which groups have it and which do not.” In this brilliant

book, Isabel Wilkerson gives us a masterful portrait of an unseen phenomenon in America as she explores,

through an immersive, deeply researched, and beautifully written narrative and stories about real people, how

America today and throughout its history has been shaped by a hidden caste system, a rigid hierarchy of

human rankings. Beyond race, class, or other factors, there is a powerful caste system that influences

people’s lives and behavior and the nation’s fate. Linking the caste systems of America, India, and Nazi

Germany, Wilkerson explores eight pillars that underlie caste systems across civilizations, including divine will,

bloodlines, stigma, and more. Using riveting stories about people—including Martin Luther King, Jr., baseball’s

Satchel Paige, a single father and his toddler son, Wilkerson herself, and many others—she shows the ways

that the insidious undertow of caste is experienced every day. She documents how the Nazis studied the

racial systems in America to plan their outcasting of the Jews; she discusses why the cruel logic of caste

requires that there be a bottom rung for those in the middle to measure themselves against; she writes about

the surprising health costs of caste, in depression and life expectancy, and the effects of this hierarchy on our

culture and politics. Finally, she points forward to ways America can move beyond the artificial and destructive

separations of human divisions, toward hope in our common humanity. Original and revealing, Caste: The

Origins of Our Discontents is an eye-opening story of people and history, and a reexamination of what lies

under the surface of ordinary lives and of American life today.

Details in Contemporary Architecture Christine Killory 2013-07-02 Curious about how Alsop Architects

managed to construct that flying, translucent rectangle at the Ontario College of Art and Design? Wonder about the sustainability of the Genzyme Building? The saying "the truth is in the details" reveals an essential quality of architectural design. How a staircase curves, a roof seemingly floats, or a concrete wall illuminates are critical questions for architects looking at or creating new work. You might forgive designers for closely guarding their signature techniques. Fortunately, Edited by Christine Killory and Rene Davids culled an amazing collection of the best trade secrets in *Details in Contemporary Architecture*.

Modern NMR Approaches to the Structure Elucidation of Natural Products Antony Williams 2015-09-24

Strychnine's poisonous nature was known in 16th century Europe, and the alkaloid was isolated in pure form for the first time in 1818. Then began a more than century-long quest to unravel the structure of strychnine that led to two Nobel prizes, clearly without the assistance of the modern spectroscopic methods to which we now have access. In his 1963 report of the synthesis, Woodward said, "The tangled skein of atoms which constitutes its molecule provided a fascinating structural problem that was pursued intensively during the century just past, and was solved finally only within the last decade." The structure elucidation of complex natural products is facilitated today by access to modern instrumentation and experimental techniques. Using a modern 600 MHz NMR spectrometer equipped with a 1.7 mm cryogenic probe and a 1 mg sample, it is now possible to acquire a comprehensive suite of 2D NMR spectra that rigorously characterizes the complex structure of strychnine in a scant 24 hours. When the 2D NMR data are combined with Computer-Assisted Structure Elucidation methods, the structure can be solved in mere seconds. It is against this historical backdrop that these two volumes regarding the Structure Elucidation of Natural Products by NMR is set.

Volume 1 discusses contemporary NMR approaches including optimized and future hardware and experimental approaches to obtain both the highest quality and most appropriate spectral data for analysis.

Volume 2 considers data processing and algorithmic based analyses tailored to natural product structure elucidation and reviews the application of NMR to the analysis of a series of different natural product families including marine natural products, terpenes, steroids, and carbohydrates. These books, bringing together acknowledged experts, uniquely focus on the combination of experimental approaches and modern hardware and software applied to the structure elucidation of natural products. The volumes will be an essential resource for NMR spectroscopists, natural product chemists and industrial researchers working on natural product analysis or the characterization of impurities and degradation products of pharmaceuticals that can be scarce as natural product samples.

Processing Technologies for the Forest and Biobased Products Industries Marius C. Barbu 2010

The Deepwater Horizon oil spill in April 2010 has shown us that increasing risks and costs have to be accepted to satisfy the increasing demand of material and energy resources from a worldwide perspective. Increasing the recovery of raw materials is one possibility, but another one is increasing efficiency in processing and production. Therefore, the development and improvement of processing technologies is a crucial factor for economic progression. This book contains discussions from the 1st International Conference on Processing Technologies for the Forest and Biobased Products Industries, held in October 2010 at Salzburg University of

Applied Sciences Kuchl/Austria. The conference provided a forum for discussions among researchers, producers, and consumers of forest and biobased products and acted as a catalyst for new research on process technologies, on quality control and process improvement, and on new concepts for use by technical managers, operations managers, and business managers. The book presents an overview of new developments in processing technologies in the forest and biobased products industries. (Series: Austria: Forschung und Wissenschaft - Technik)

Criminalistics: Forensic Science, Crime and Terrorism James E. Girard 2010-07-23 Criminalistics: Forensic Science, Crime and Terrorism, Second Edition introduces readers with no background in biology or chemistry, to the study of forensic science, crime analysis and application. Principle topics such as fingerprint identification, DNA, paint and glass analysis, drug toxicology, and forensic soil characterization are thoroughly explained in a reader-friendly manner. Unlike other texts available on this topic, this Second Edition is updated to include comprehensive coverage on important homeland security issues including explosives, weapons of mass destruction, and cybercrime. Key Features: * New case studies and updated sections on analysis of fingerprints and questioned documents offer recent developments and findings in this critical field.

* Two new chapters on chemistry and biology equip readers with the foundation and tools necessary to understand more advanced topics. * Extensive updating of Chapter 11 "Drug Use and Abuse," provides the latest methods of drug testing and analysis by federal and state law enforcement agencies. Instructor Resources: * Answers to end of chapter questions * Lecture Outlines * Test Bank * PowerPoint Lecture Outlines Student Resources: * Companion Website (secure) featuring: - web links - interactive glossary - interactive flashcards - chapter spotlights - crossword puzzles *Access to the student companion website can be purchased here <http://www.jblearning.com/catalog/9780763789947/>. The Story of Paul Bigsby Andy Babiuk 2009-01-01 (Book). Most musicians are familiar with the famous Bigsby Vibrato, but not as many know about the wonderful guitars that Paul Bigsby built in the 1940s. Bigsby, who was responsible for developing and refining the pedal steel guitar, also built the first modern solid body electric guitar for Merle Travis in 1948, predating Leo Fender and Gibson's Les Paul by a number of years. The Story of Paul A. Bigsby tells how Bigsby influenced Fender and Gibson, as well as a number of other guitar manufacturers, in building techniques and design. This deluxe illustrated coffee table book contains over 300 color and black & white photos. Many of these have not previously been published, and over 50 are actual Bigsby instrument photos taken by fine arts photographer Greg Morgan. The book also comes with an audio CD of Paul Bigsby, recorded in the late 1950s, telling stories of his business.
